Disclaimers

Included in this report

This report can be generated with filters applied to operating system platforms, components, and/or software capabilities. This section reflects how the report was filtered when it was generated.

Legend

- The information about this item is included in this report.
 - The information about this item is not included in the report filter.
-

Platforms

- Windows

Component list

Desktop

- Aurora starter store (user interface)
- Development environment
- Management Center for WebSphere Commerce
- WebSphere Commerce Accelerator, Administration Console and Organization Administration Console

Capabilities

Prerequisites

- Application Servers
- Databases
- Java
- Web Browsers

Related Software

- Application Servers
- Development Tools
- Integrated Application Platform
- LDAP Servers
- Message Oriented Middleware
- Reporting and Analysis

Operating Systems

The Operating systems section specifies the operating systems that WebSphere Commerce Developer Professional 9.0 supports, organized by operating system family.

Operating system families

Hardware

WebSphere Commerce Developer Professional 9.0 requires the following hardware, organized by type of hardware, deployment units, or components.

Installable software

Operating System Families

[Windows](#)

Windows

Hardware	Components	Requirement	Applicable operating systems
Disk Space	Desktop <ul style="list-style-type: none">• Aurora starter store (user interface)• Development environment• Management Center for WebSphere Commerce• WebSphere Commerce Accelerator, Administration Console and Organization Administration Console	Diskspace - 50 GB	All supported Windows operating systems
Display	Desktop	Display- Graphics capable monitor with a color depth of at least 256 colors	All supported Windows operating systems

Hardware	Components	Requirement	Applicable operating systems
	<ul style="list-style-type: none">• Aurora starter store (user interface)• Development environment• Management Center for WebSphere Commerce• WebSphere Commerce Accelerator, Administration Console and Organization Administration Console		
Memory	Desktop <ul style="list-style-type: none">• Aurora starter store (user interface)• Development environment• Management Center for WebSphere Commerce• WebSphere Commerce Accelerator, Administration Console and Organization Administration Console	Memory - 4 GB	All supported Windows operating systems
Mice and pointing devices	Desktop <ul style="list-style-type: none">• Aurora starter store (user interface)• Development environment	Pointer Device - Mouse or other pointing device(optional)	All supported Windows operating systems

WebSphere Commerce Developer Professional 9.0

Detailed System Requirements

Hardware	Components	Requirement	Applicable operating systems
	<ul style="list-style-type: none">• Management Center for WebSphere Commerce• WebSphere Commerce Accelerator, Administration Console and Organization Administration Console		
Network: adapters, drivers, protocols	Desktop <ul style="list-style-type: none">• Aurora starter store (user interface)• Development environment• Management Center for WebSphere Commerce• WebSphere Commerce Accelerator, Administration Console and Organization Administration Console	Network - LAN Adapter that supports TCP/IP	All supported Windows operating systems
Processor	Desktop <ul style="list-style-type: none">• Aurora starter store (user interface)• Development environment• Management Center for WebSphere Commerce• WebSphere Commerce Accelerator,	Processor - 64 Bit Processor	All supported Windows operating systems

Hardware	Components	Requirement	Applicable operating systems
	Administration Console and Organization Administration Console		

Packaging list

WebSphere Commerce Developer Professional 9.0 includes the following products:

Co-packaged software

Product name	Capability	Applicable Operating System Families	Notes
DB2 Advanced Workgroup Server Edition 11.1.0	Not specified	Windows	(2)
Rational Application Developer for WebSphere Software 9.6	Development Tools	Windows	No
WebSphere Application Server 9.0	Application Servers	Windows	(1)
WebSphere Liberty 17.0.0.2	Application Servers	Windows	No

Co-installed software

No co-installed software products specified.

Co-packaged Notes

1. WebSphere Application Server - Base 9.0 is packaged with WebSphere Commerce. It requires to be upgraded to 9.0.0.5.
2. DB2 Advanced Workgroup Server Edition 11.1.0 is packaged with WebSphere Commerce. It requires to be upgraded to 11.1.2.2.

Glossary

Bitness

Compatibility of the product with the bit version support that is provided by an operating system. Different parts of a product might run on the same operating system but support different application bitness. For example, one part of the product might run only in 32-bit mode, whereas another might support 64-bit tolerate mode.

31: The product or part of the product runs as a 31-bit application in a 31-bit operating environment.

32: The product or part of the product runs as a 32-bit application in a 32-bit operating environment.

64-tolerate: The product or part of the product runs as a 32-bit application in a 64-bit operating environment.

64-exploit: The product or part of the product runs natively as a 64-bit application in a 64-bit operating environment.

Co-packaged

Additional products that are included in the product package.

Co-installed

Additional products that are included in the product package and installed when the product is installed.

Deployment unit

Deployment Structure identifies pieces of a product that can be independently deployed onto one or more machines in a distributed infrastructure.

- The top level of the deployment structure consists of one or more deployment units. There are four possible deployment units that a product might support: Desktop, Server, Agent or client, Mobile.
- Deployment units may be further divided into deployable **components**

Desktop deployment unit: Part of the deployment structure intended for use by a single user, typically installed on the user desktops. Examples of desktop deployment units include development tools, administrative tools, stand-alone business applications.

Server deployment unit: Part of the deployment structure that can provide services to multiple clients, providing the server in a client-server architecture. Examples of server deployment units include application servers, management servers, database servers and server-based business applications.

Agent or client deployment unit: Part of the deployment structure that allows remote connection between software. Examples of agent or client deployment

units include agents in management system that are installed in the same tier as the managed resources, a remote application, or database clients that are installed with the software accessing the remote services.

Mobile deployment unit: Part of the deployment structure intended for use by a single user, typically installed on a mobile device. An example of a mobile deployment unit is a mobile application.

Hypervisor	A virtual machine in which a product can run on a guest operating system.
-------------------	---

Limited operating system support	By default, the supported guest operating systems for a product and a hypervisor are the operating systems that are supported by both the product and the hypervisor. If a product restricts support to a subset of these operating systems, this restriction will be indicated by specifying that there is Limited Operating System Support.
---	---

Operating system minimum	The minimum operating system maintenance level that is required to run on the product.
---------------------------------	--

Prerequisite minimum	The minimum maintenance level that is required for the prerequisite to work with the product.
-----------------------------	---

Product minimum	The minimum maintenance level that is required for the product to run on the operating system, on an hypervisor, or work with a prerequisite product or supported software.
------------------------	---

Supported software minimum	The minimum maintenance level that is required for the supported software to work with the product.
-----------------------------------	---

Long Term Support Release	A Long Term Support Release is a recommended product level for which support, including defect and security updates, will be provided over a specified period of time.
----------------------------------	--

Continuous Delivery Product	A Continuous Delivery Product delivers new function to clients more frequently.
------------------------------------	---

Continuous Delivery Product - Long Term Support Release	A Continuous Delivery Product delivers new function to clients more frequently. Since frequent releases may not be suitable for all client environments, Long Term Support Releases provide a package that will be supported for a longer period of time.
--	---
